SKILLS

CURIOSITY

Curiosity moves me through life and business, in fact business is an interchange of necessities and a connection with people. It took me too long to understand this reality. I believe in a systemic thinking and this takes me to a long journey to the human knowledge.

VISION

"If I can visualize what you say I can do it greater" Once we get the possibility to discover what is the vision of the other I can move forward my vision and make from this trip a better tomorrow.

MANAGEMENT & LEADERSHIP

I work with people. I love the way people think. This is the starting point of my leadership. Management is the what of my leadership. Leadership is the why of my purpose.

EDUCATION

2021

Data Driven Design
La Nave Nodriza

Capra Course. The System of Life

Fall SEPT 21
